

Sella

Well-being and independence

Benefits of Sella

For your
well-being

- Independence and self-reliance
- High comfort
- Hydraulic lift for better mobilisation

Patient

- Reduced physical effort
- Simple examination and easy access

Staff

- An attractive design
- Increased efficiency of the hospital ward

Management

Excellent manoeuvrability

In combination with the necessary functions, ergonomically suitably selected proportions and a friendly design, the Sella multifunctional chair brings a number of advantages as well as ease for the immobile person and service staff.

Its low weight, great manoeuvrability and sitting comfort make this product an excellent helper in nursing homes, long-term medical institutions, hospitals and also in private care.

Rotation of the castors

A chair with small castors is more appropriate for comfortable transport in small and narrow spaces. The rotation of the castors around an axis increases the manoeuvrability of the chair in open and small spaces.

Easy transport

Not only does the low weight of the chair contribute to comfortable transport but also to ergonomic control.

The central brake increases patient safety and the simplicity of control for the nurse.

Easy mobilisation

Mobilisation

Hydraulic lift for tipping the seat and adjusting the armrests for arm support completely eliminates the physical exertion of the staff that is necessary for manipulating the patient.

Mobilisation is one of the most physically demanding procedures in healthcare.

Moreover, the chair brakes can be locked automatically by pressing down on the safety footboard.

Unique variability

High variability of the positions enables patients to adjust the chair according to their individual needs.

Unique variability

Comfortable and easy adjustment of backrest by the patient also increases his/her self-reliance and independence.

Positioning for the maximal comfort of the client

Height adjustment

Flat position

For efficient care

Comfortable transfer

Height adjustment makes the work of nurses easier as it enables comfortable transfer of the patient from the chair to the bed.

Simple examination

It is also possible to perform a simple examination or take a blood sample directly from the patient sitting in the chair.

Easy access

The structure of the Sella chair enables easy access for the staff, for example when ultrasound examination needed.

Accessories

Table

Independent adjustment of backrest

Independent adjustment of legrest

Side support (pair)

Stacking pocket

Urine bag holder

Headrest, big

Table safety lock

Table with safety barrier

Table holder

Telescopic infusion stand

Holder for infusion stand

Easy cleaning
