

Invitation to **ISICEM 2016**

We cordially invite you to the **36th International Symposium on Intensive Care and Emergency Medicine (ISICEM) in Brussels, Belgium**, where the LINET Group will be presenting **innovative technology** specially developed for intensive care – the **Multicare** resuscitation bed equipped with an integrated **Symbioso mattress**.

Come to the International Symposium on Intensive Care and Emergency Medicine to see how cutting-edge LINET technology helps both save patient's lives and their convalescence! **We look forward to seeing you!**

Two professionals: Multicare and Symbioso

Its performance and features help staff **save lives in intensive care units**. It actively **supports vital functions**, provides a **100% safe space** and facilitates **timely mobilisation**. The extremely **quiet and efficient Symbioso mattress** integrated into the Multicare bed works on the dual principle of constantly maintained pressure and a suitable microclimate. This improves the prevention of pressure ulcers caused by pressure and humidity.
