

## OUR VISION

**„BE AN OBJECT OF DESIRE, NOT JUST CHOICE“**

### LINET'S COMMITMENTS TO THE COMPANY MANAGEMENT SYSTEM

**CUSTOMERS** – To increase the satisfaction of our customers and put them in the first place of our activities, to understand and meet their current and future requirements.

**QUALITY** – Produce products in accordance with the management system according to international and regional standards aligned with Quality Manual. Continuously improve the system of prevention of nonconformities and incidents through a responsible approach to the process and product risks identification, evaluation and control and put it in the forefront before taking reactive corrective countermeasures. Regularly review compliance with the requirements of the management system, review the company's objectives, target values and established programs. Manage, measure and monitor processes, evaluate their effectiveness with the aim of their continuous improvement.

**PRODUCTS** – To develop, innovate, manufacture, supply and service products that maintain their dominant position at the top of the medical device market in the field and that will convince and inspire our customers with their economy, functionality and attractiveness.

**EMPLOYEES** – Continuously ensure the development of qualifications and skills of employees, take care of their satisfaction and health. Motivate them to increase responsibility for quality and to minimize the occurrence of discrepancies. Motivate employees to take responsibility to protect the environment, to minimize environmental impacts and accidents, to safety and health at work, and to reduce the risk of illness, accidents, and adverse events in the workplace. Clearly organize relationships within the company and build a dignified work and environment.

**ENVIRONMENT** – Use technologies, processes, products and materials that do not endanger employees and the environment and that are safe and environmentally friendly in terms of their intended use. Depending on production, reduce the consumption of energy and raw materials, based on scientific and technical knowledge to ensure their ecological handling, storage and processing. Ensure disposal of packaging and comply with binding environmental emission limits. Strive to minimize them. In this area, we follow the applicable legislation and the ISO 14001 standard.

**LEGISLATION** – To comply with appropriate obligatory legal, regulatory, certification and other requirements such as safety and technical requirements for our products, health and safety requirements for work and environmental protection requirements.

The company's management is committed to creating the conditions for fulfilling the company's vision, policy and strategic goals and communicate with all employees and partners.

At the same time, we expect from all employees and other interested parties to understand and support application of this policy.
