Improved patient care

COMFORT FOR EVERYONE
The bed accommodates hospitalised overweight or taller patients.

— Robust construction.
— Safe working load 180–250 kg.
— Mattress platform width 90 cm.
— Possible bed extension by 15 cm.
— Split plastic siderails with soft drop function.

CONTROLS WITHIN REACH
Several clear and easy to use controls are immediately at the patient’s disposal.

1. **Handset**
   to control the bed positions can also come with a backlit keyboard.

2. **Satellite control panel**
   comes on a flexible arm and is easy to access, the buttons are embossed for vision impaired patients.

3. **Controls in the siderails**
   are easy to use and always to hand.
ERGOFRAME® +16 cm
When repositioning the backrest and thigh rest, the Ergoframe® function minimises the pressure and shear forces in the patient’s pelvic region. This results in a significant reduction in the development of pressure ulcers.

EASIER MOBILISATION
The mattress platform is equipped with an integrated holder for the MobiLift® which supports independent patient mobilisation.
— Respects the different height of patients and can be set at two height levels.
— Always set at the optimum supporting exit point.
Safety first

SAFE SIDERAILS

The bed can be equipped with soft drop function of split plastic siderails or single ¾ siderails. In each case they comply with valid standards and all gaps on them are designed with regard to safety.

— The safety of the split plastic siderails is guaranteed by a system of two independent unlocking movements.

— The single ¾ siderail controls are located ergonomically for the first time at the top of the siderail.

— The siderails are lowered using the soft drop function which applies a gas spring to soften the effect of the siderail’s movement.

THE UNIQUE PROTECTOR

The use of the Protector enables protection along the entire length of the mattress platform. The Protector is located at the foot end of the bed and is linked to the single collapsible siderail both in terms of dimensions and design.
Safety first

GO BUTTON
The green GO button protects the patient against an injury caused by any unintentional movement of the bed. Use the GO button to activate the bed control units for a period of 3 minutes from when last pushed.

BETTER PROTECTION
In some cases it is appropriate to provide the patient with a higher level of protection. An easy-to-assemble extension piece makes the siderail 10 cm higher. The Extender is especially recommended when using an active mattress – up to 26.5 cm height.

GO BUTTON
The green GO button protects the patient against an injury caused by any unintentional movement of the bed. Use the GO button to activate the bed control units for a period of 3 minutes from when last pushed.
For easy hygiene
PLASTIC MATTRESS PLATFORM
The mattress platform consists of eight separate removable plastic parts and is produced to make bed hygiene very easy and fast.
- Each part weighs only 700 g, which facilitates hygiene.
- Embossed patient pictogram to identify the part’s correct position.

JOINT-FREE TECHNOLOGY
The latest technology is used during the manufacture of individual parts to minimise the space where unwanted infections may hide. In terms of easy cleaning, the bed is very safe and user friendly.

SIMPLE CONSTRUCTION
From the start to achieve easy cleaning, the Eleganza 1 bed was designed to maximise the simplification of the structure to include individual parts and surfaces.
- Only minimum space next to the bed is required to lower the siderails thanks to the innovative mechanism.
Staff friendly
5th CASTOR
The activated 5th castor makes transfer through long corridors easier. Creating a turning point in the middle of the bed, it allows for tight turns, also providing significant reduction in the force needed to turn the bed.

SUPERVISOR CONTROL PANEL
The panel has a coiled cable providing flexibility of movement and operation of the bed from an optimum position.

CENTRAL CONTROL PANEL
The panel for the control and deactivation of the functions is located under the foot end and is integrated into the bed frame.

FOOT CONTROLS
The controls allow the practical and easy adjustment of the height and examination position. They are equipped with a mechanical protector against accidental activation.
Eleganza 1 Extra SAFE

CARE AND ABSOLUTE SAFETY

The Eleganza 1 Extra SAFE offers a high quality standard of hospital bed. Thanks to the modifications it is suitable for specific departments such as psychiatric, prison hospital, mental health etc.

Ergoframe®
When adjusting the back and thigh rest the Ergoframe® system extends the mattress platform by 16 cm.

Cardiac chair
The position can be set by pressing a single button.

* Unlike the standard Eleganza 1 version
**FIXED PARTS**

The entire bed and its panels are firmly installed and the mattress platform parts are also fixed. All smaller parts of the bed, such as the hooks on the accessory bar, are secured.

**CABLE PROTECTION**

The power supply cable is in a box with a lock. The cables are fed in a way so they do not endanger the patient.

**SEGUFIX KEY**

The Segufix is compatible, and the operator does not need any additional keys.

**FIXED VERSION**

A bed in a version without castors can be fixed to the floor.
Eleganza 1 Nursing
In its nursing-care version the Eleganza 1 increases the quality of long-term care. The function and properties fully comply with the needs of nursing homes and long-term and after-care facilities.

**WOODEN DECORS**

The colour scheme of the bed is highly variable and fully conforms to the environment of the specific facility. By choosing his own design and version the customer will acquire a functional and totally individual model.
Eleganza 1 LE

COST-EFFECTIVE VERSION
The Eleganza 1 LE bed construction is the same as the classic Eleganza 1 model: lift, maximum load, undercarriage including all versions of castors and brakes, mattress platform and ends. It also comes with either single collapsible siderails or split plastic siderails.
The bed’s control unit is simpler.
The simplified version of the Eleganza 1 LE bed offers high functionality at a more affordable price.

- Universal control box 100–240 V.
- Bed can be equipped with a Plug and Play handset.
- 1 lever of mechanical CPR (possible upgrade for standard 2 levers).

**BED CONTROL**

The Eleganza 1 LE is equipped with a simpler control unit, so the bed can be controlled by a single handset. A simple handset controls the electrical positioning and height setting.

- With mechanical lock.
- 8 or 10 buttons (two buttons for tilting into the TR/ATR position).
Practical details

1. Removable bed ends can be fixed to the mattress platform frame with simple eccentric locks.

2. Horizontal corner bumpers protect the bed.

3. Mattress platform is easily removable and cleanable and is compatible with 86 or 90 cm mattresses.

4. Linen shelf may also be used to store the supervisor panel.

5. Mechanical CPR – additional option for electrical CPR urgent use
CHOICE OF COLOURS

The practical, modest and very attractive design of the Eleganza 1 bed together with a wide range of colour effects creates a pleasant and up-to-date hospital environment.
